for: Camden General Hospital

January 2012

In fulfillment of the requirements of the Patient Protection and Affordable Care Act Pub.L. No.111-148, 124 Stat. 119, enacted March 23, 2010.

RESOLUTION OF THE BOARD OF TRUSTEES
OF
JACKSON-MADISON COUNTY GENERAL HOSPITAL DISTRICT
AND
HUMBOLDT GENERAL HOSPITAL, INC.
AND
GIBSON GENERAL HEALTHCARE CORPORATION
AND
CAMDEN GENERAL HOSPITAL, INC.
AND
BOLIVAR GENERAL HOSPITAL, INC.
AND
MILAN GENERAL HOSPITAL, INC.
AND
PATHWAYS OF TENNESSEE, INC.

COMMUNITY HEALTH NEEDS ASSESSMENT APPROVAL

WHEREAS, the Patient Protection and Affordable Care Act, enacted March 10, 2010, required public and not-for-profit hospitals to perform a Community Health Needs Assessment for each hospital; and

WHEREAS, the staff of the District has conducted such an Assessment and prepared the report as required for each of its hospitals; and

WHEREAS, the Assessments were prepared in accordance with IRS issued Notice 2011-52 Notice Regarding Community Health Needs Assessments for Tax Exempt Hospitals; and

WHEREAS, the Board finds that the Assessments substantially meet the requirements of the of the Patient Protection and Affordable Care Act and the IRS Issued Notice 2011-52, and that the Implementation Strategies set forth in the Assessments shall be implemented in accordance with Management recommendations.

NOW, THEREFORE, BE IT RESOLVED, that the Community Health Needs Assessments given to the Board are approved and adopted.

ADOPTED, this the 25th day of September, 2012.

PHIL BRYANT, Chairman

Exhibit

Patient Protection and Affordable Care Act-Required Community Health Needs Assessments

Conducted By: West Tennessee Healthcare Department of Business Development and Planning

- Conducted to fulfill requirements of the Patient Protection and Affordable Care Act enacted March 10, 2010.
- Required for all public and not-for-profit hospitals only
- Procedures followed and information provided in the reports meet requirements in IRS issued Notice 2011-52 Notice Regarding Community Health Needs Assessments for Tax Exempt Hospitals
- Hospital organizations with multiple hospitals must conduct community needs assessment for each hospital.

- Assessments conducted for the following counties:
- Camden General Hospital-Benton County
- Bolivar General Hospital-Hardeman County
- Gibson General Hospital-Gibson County
- Humboldt General Hospital-Gibson County
- Milan General Hospital-Gibson County
- Jackson-Madison County General Hospital-Madison, Crockett, Chester Counties
- Pathways of Tennessee-Crockett, Dyer, Gibson, Hardeman, Haywood, Henderson, Lake, Madison, Obion, Weakley Counties

- Assessment must include the following:
 - Description of the community and how "community was determined"
 - Description of the process and methods used, including sources and dates of data collection, analytical methods used, information gaps, collaborating organizations
 - Report has 10 organizational goals, committee at each facility that worked on assessments, secondary data that was reviewed that included at least 3 years of trend data for each health issue, analytical method (Hanlon Method), information gaps, collaborating organizations
 - Description of how hospital considered input from persons representing broad interests of the community
 - Each county had a committee of community representatives who participated in data collection & process of prioritizing health issues

 Community surveys distributed throughout each county requesting information on perceptions of health issues facing the area

Number of returned surveys:

	Madison County:	1,099
•	Gibson County:	387
ė	Benton County:	158
•	Hardeman County:	425
	Chester County:	145
	Crockett County:	148
•	Pathways:	263

- Description of prioritizing health needs:
 - community committee input
 - · Hospital staff use of Hanlon Method that considers size, seriousness, and effectiveness in prioritizing health issues

- Each report contains listing of health resources for each county.
- Community committee had reps from county health department, agencies serving low income & minorities
- Implementation strategies must be identified for each prioritized health issues
- Pathways of Tennessee identified health issues:
 - · Chronic mental health
 - Depression
 - · Domestic violence/anger management
 - Co-occurring (mental health and substance abuse)
 - · Alcohol, illegal drugs, prescription drug use

Executive Summary

Benton County Community Health Needs Assessment Executive Summary

Under the leadership of Camden General Hospital, a community health needs assessment of Benton County, Tennessee was conducted in fulfillment of the requirements of the Patient Protection and Affordable Care Act Pub.L. No.111-148, 124 Stat. 119, enacted March 23, 2010. The designated "community" for the needs assessment is Benton County, Tennessee. The mission of the Community Health Needs Assessment is to evaluate and improve the health status and wellbeing of the residents of Benton County, Tennessee with an emphasis on preventive measures. The community health needs assessment process was a blending of citizen perceptions of health issues facing the community with secondary data on the actual extent of particular problems.

Community input on the perception of health issues facing the area was accomplished through a survey administered throughout the Benton County community. A total of 158 completed surveys were returned. The completed surveys were analyzed focusing on what percentage of the respondents thought a health issue "was not a problem," "not sure," or "was a problem" for the community. Community input was also considered from a diverse group of community representatives. The community committee narrowed a large list of health issues on the survey to eight (8). These 8 health issues were:

Influenza Asthma Obesity

Heart Conditions

Diabetes

High Blood Pressure

Cancer

of Retired Persons.

Allergies

Further research was conducted by hospital staff to provide information on the size, seriousness, and available community resources for each of the 8 health issues identified by the community committee. Benton County needs were prioritized by a team of Hospital staff using a mathematical algorithm called the Hanlon Method. The Hanlon Method, developed by Felix, Burdine and Associates, was used to assign numerical values to rate the size, seriousness, and effectiveness of available interventions for each health issue. Consistent and common resources identified for each health issue include the Benton County Health Department, the Benton County School System, local physician clinics, local churches, community and senior centers, civic clubs, local non-profit agencies,

As a result of reviewing secondary data on the size, seriousness, available community resources and utilizing the Hanlon Method algorithm, the hospital committee identified five priority health issues from the 8 identified by the community committee. The five priority health issues:

American Heart Association, American Cancer Society, American Diabetes Association, and American Association

Heart Conditions
High Blood Pressure
Cancer
Obesity
Diabetes

Camden General Hospital has developed implementation strategies to address the five health issues identified through the community health needs assessment. The strategies emphasize screenings, education and collaboration with other community agencies. Camden General Hospital provides blood pressure screenings in May each year. The Hospital participates, with numerous community agencies, in the Carhartt Health Fair. At the Health Fair, the Hospital offers screenings for hypertension, the influenza vaccination, height, weight, and BMI. Camden General Hospital conducts prostate screenings each September and breast screenings in October each year, and the Hospital provides athletic physicals in the Benton County School System, screenings for hypertension, and BMI in August each year.

Final Report

Introduction

Under the leadership of Camden General Hospital a community health needs assessment of Benton County, Tennessee was conducted in fulfillment of the requirements of the Patient Protection and Affordable Care Act Pub.L. No.111-148, 124 Stat. 119, enacted March 23, 2010. The community health needs assessment process was a blending of citizen perceptions of health issues facing the community with secondary data on the actual extent of particular problems. Community input on the perception of health issues facing the area was accomplished through a survey administered throughout the Benton County community. Community input was also considered from a diverse group of community representatives. Benton County needs were prioritized by a team of Hospital staff using a mathematical algorithm called the Hanlon Method. A prioritized list of needs, implementation activities and associate community resources are provided.

Description of the Hospital and Community

Camden General Hospital was acquired by the Jackson-Madison County General Hospital in 1995. Effective December 2005 Camden General Hospital converted to a critical access hospital with 25 licensed beds, all of which are in service. The Hospital is a member of the American Hospital Association, the Tennessee Hospital Association, and is accredited by The Joint Commission. Camden General Hospital has been approved by the U.S. Department of Health and Human Services for participation in Medicare and Medicaid Programs. The service area for Camden General Hospital is Benton County.

The Hospital provides inpatient and outpatient services, emergency services 14 hours a day/7 days a week, an accredited laboratory that operates 24 hours a day, general medicine services, internal medicine services, pharmacy, radiology (diagnostic X-Ray, computerized axial tomography, magnetic resonance imaging), respiratory care, and physical therapy.

The designated "community" for the needs assessment is Benton County, Tennessee. With a 2010 population of 16,130, Benton County is located in the rural Northwest Tennessee approximately 145 miles East of Memphis and 93 miles West of Nashville. The population is 96 percent Caucasian, 2 percent African American, and 2 percent Other races. According to the American Community Survey (2005-2009), 18.1 percent of the population is below the Federal poverty level. The per capita personal income level is \$19,706. The population under 65 years of age represents 81 percent while the over age 65 population is 19 percent of the total. About 23 percent of the population age 25 and older does not have a high school diploma or GED; 42

percent have a high school diploma; 21 percent have some college, and 14 percent have a Bachelor's degree or higher.

Benton County has a wide range of industries that employ individuals living in and around the county. Benton County is home to manufacturers or businesses such as: AT & T, Benton County Cablevision, Benton County Electric System, Benton County Co-Op, West TN Public Utilities District, Arnold Fabricating and Machine, ATA Defense Industries Inc., Berry Machine and Tool Co. Inc, Carhartt, E.I. Du Pont, Jones Plastic and Engineering, Palmer Company, and Unimin. The community houses an economic development center, the UT Martin Reed Center.

The county seat of Benton County is Camden, Tennessee. The City of Big Sandy, City of Camden, Benton County Government, and the Benton County School System are all located in Benton County. The public school system has seven schools and serves approximately 2,464 students.

Description of the Community Health Needs Assessment Survey Process

The mission of the Community Health Needs Assessment is to evaluate and improve the health status and wellbeing of the residents of Benton County, Tennessee with an emphasis on preventive measures. The community health needs assessment of Benton County, Tennessee was a blending of citizen perceptions of health issues facing the community with secondary data on the actual extent of particular problems.

The Community Health Needs Assessment had ten (10) organizational goals.

- To form alliances between Camden General Hospital, non-profit organizations, and the community at large to assess, improve, and promote the community health of Benton County, Tennessee.
- To identify internal resources already available to assist in improving community health.
- To assist in identifying available community health resources.
- To define "health" as it pertains to Benton County, Tennessee.
- To identify collaborative participants.
- To educate and gain formal support of the West Tennessee Healthcare leadership team, the Board of Trustees, community leaders, and others.

- To assist in establishing baseline health status assessment of Benton County by collecting and reviewing available data and statistics on residents' perceptions of health issues facing the community and secondary data on such health issues.
- To assist in determining the standards against which to measure the current and future health status of the community.
- To assist in the communitywide establishment of health priorities and in facilitating collaborative planning, actions, and direction to improve the community health status and quality of life.
- To promote the need for ongoing evaluation of the community health assessment process to learn results, establish new goals and encourage further community action and involvement.

The first step in the community health needs assessment process was to identify an internal committee of hospital staff to organize the process, facilitate data collection, review and analyze the results. Members of Camden General Hospital staff committee were:

Denny Smith Camden General Hospital Administrator

Mar Steinbuck Camden General Hospital-Retired/Administrator

City Councilman

Bill Kee Chamber of Commerce

The Hospital staff committee assisted with the development of an anonymous survey instrument that was used to collect input from a broad range of community interests. The survey instrument included questions on the perceptions of the respondents relative to communicable diseases, chronic health problems, family health concerns, access to health resources, community concerns, and demographics of age, race, education level, insurance, and residence. Respondents were asked on the survey to indicate whether they thought a particular health issue was "1=not a problem," "2=not sure," or "3=is a problem" for the Benton County community. Locations to distribute the survey throughout the community were also suggested and discussed by committee members.

Upon completion of the survey instrument, a committee of community representatives was formed to review the survey instrument for completeness and assistance with interpretation of the results. An invitation to serve on the community committee was sent to prospective members from the Hospital Administrator of Camden General Hospital on March 15, 2011. A copy of this letter is included in Attachment A. Members of the committee represented a broad

range of community interests served by Camden General Hospital. Members of the community committee were:

Rachael Baker, Camden School System
Katherine Boggs, Developmental Council
Gerilyn Burnett, Coordinated School Health
Tracy Byrd, Camden General Hospital
Heather Deckard, UT Extension Service
Peggy Evans, Big Sandy
Gary Evans, Coalition
Bill Kee, Chamber of Commerce
Barbara Kelly, Benton County Health Department
John Roberts, Department of Human Services
Denny Smith, Camden General Hospital
Alvin Smothers, Retired
Mar Steinbuck, City Council

Membership on the community committee included Barbara Kelly, a part of the Benton County Health Department. Mrs. Kelly has special knowledge of public health issues of influenza, sexually transmitted diseases, teenage pregnancy, HIV/AIDS, Hepatitis C, and access to health resources.

An introductory meeting of the community committee was held on March 15, 2011. At this meeting the process for conducting the community health needs assessment was reviewed and discussed. The draft survey instrument to collect citizen perception of health issues facing Benton County was also reviewed and suggested changes and modifications were given by committee members. Locations to distribute the anonymous survey throughout the community were also suggested and discussed by committee members.

The survey instrument was finalized and then distributed by hand throughout the Benton County community. Attachment B contains a copy of the survey instrument. Table 1 contains a list of locations, dates, and number of returned surveys from the survey process.

Table 1 Community Health Assessment Survey Information

Location

Camden General Hospital
Benton County School System Faculty/Staff
Chamber of Commerce
UT Extension Services

All Surveys in Benton County were distributed on 6/3/2011.

A total of 158 completed surveys were returned by November 17, 2011. The completed surveys were analyzed focusing on what percentage of the respondents thought a health issue "was not a problem," "not sure," or "was a problem" for the community.

Community Health Needs Assessment Prioritization Process Size, Seriousness, Effectiveness & Available Community Resources

The survey results and a summary page were provided to the community committee which met on November 17, 2011 to review the data and results. The community committee was asked to narrow the list of 54 health issues on the survey instrument to a more manageable number. To assist with this process, hospital staff provided a summary page that highlighted health issues where at least 50 percent of the respondents indicated a health issue "was a problem" for the community. Attachment C contains the survey summary. For the following list of health issues, at least 50 percent of the respondents indicated it "was a problem" for the community.

Influenza Heart Conditions High Blood Pressure Lung Cancer

Breast Cancer
Arthritis

Obesity Asthma Diabetes Allergies Dental Care

Teenage Pregnancy

Lack of financial resources

Tobacco Use

Alcohol and Drug Abuse

Using the 50 percent threshold as a guide the community committee narrowed the list of health issues on the survey to eight (8). These 8 health issues were:

Influenza Heart Condition High Blood Pressure Cancer

Obesity Asthma Diabetes

Allergies

The internal hospital staff committee was reconvened on November 17, 2011 to prioritize the list of 8 health issues identified by the community committee for further research. The Hospital staff used a mathematical algorithm called the Hanlon Method, developed by Felix, Burdine and Associates, to assign numerical values to rate the size, seriousness, and effectiveness of available interventions for each health issue. The Hanlon Method algorithm is as follows:

A=size of the identified health problem

B=seriousness of the identified health problem

C=effectiveness of available interventions for the identified health problem

A=Size

Size is defined by the prevalence of a condition, characteristic, or disease in an entire population (or among a specific sub-group population). The numerical scoring for the size of a health issue is:

Percent of popula	<u>tion with health probler</u>	<u>n</u> <u>Score</u>
25%+		9-10
10-24%		7-8
1-9%		5-6
0.1-0.9%		3-4
0.01-0.09%		1-2

B=Seriousness

Seriousness is defined by urgency to intervene, severity (leads to death?), disproportionate among vulnerable populations, or economic impact. The numerical scoring for seriousness of a health issue is:

<u>How serious</u>	Score
Very Serious	9-10
Serious	6-8
Moderately Serious	3-5
Not Serious	0-2

C=Effectiveness of Available Interventions

Effectiveness of available interventions is defined by the "best real world" expectations for Camden General Hospital to be effective in addressing a health issue based on, in part, available community resources. The numerical scoring for effectiveness of available interventions is:

<u>Effectiveness</u>	Score
Very Effective (80%+)	10
Relatively Effective (60-79%)	8-9
Effective (40-59%)	6-7
Moderately Effective (20-39%)	4-5
Relatively Ineffective (<20%)	0-3

Information on the Hanlon Method is found in Attachment D.

Further research was then conducted by hospital staff to provide information on the size, seriousness, and available community resources for each of the 8 health issues identified by the

community committee. Attachment E has data on the size of the health issues and Attachment F lists available community resources for each of the 15 identified health issues. Consistent and common resources identified for each health issue in Attachment F include the Benton County Health Department, the Benton County School System, local physician clinics, local churches, community and senior centers, civic clubs, local non-profit agencies, American heart Association, American Cancer Society, American Diabetes Association, and American Association of Retired Persons

Table 2 contains the Hanlon Method scoring for each identified health issue.

Table 2
Hanlon Method Scoring Results

Issue	A=	B=	g Results C=		
	Size	Seriousness	Effectiveness	Total (A+2B)C	
Influenza	1	1	1	3	
Heart Condition	9	9	9	243	
High Blood Pressure	9	9	9	243	
Cancer	10	10	10	300	
Obesity	10	10	8 ÷	240	
Asthma	2	2	1	6	
Diabetes	10	10	9	270	
Allergies	10	2	1	14	

As a result of reviewing secondary data on the size, seriousness, available community resources and utilizing the Hanlon Method algorithm, the hospital committee identified five priority health issues from the 8 identified by the community committee. The five priority health issues:

Heart Conditions

High Blood Pressure

Cancer

Obesity

Diabetes

Implementation Strategies

Camden General Hospital has developed implementation strategies to address the five health issues identified through the community health needs assessment. The strategies emphasize screenings, education and collaboration with other community agencies.

Heart Conditions, Diabetes, and High Blood Pressure

Camden General Hospital provides blood pressure screenings in May each year. The Hospital participates, with numerous community agencies, in the Carhartt Health Fair. At the Health Fair, the Hospital offers screenings for hypertension, the influenza vaccination, height, weight, and BMI.

Cancer

Camden General Hospital conducts prostate screenings each September and breast screenings in October each year.

Obesity

Camden General Hospital provides athletic physicals in the Benton County School System, screenings for hypertension, and BMI in August each year.

Conclusion

The Benton County Community Health Needs Assessment was presented to the West Tennessee Healthcare Quality Council on July 3, 2012. The document was approved for submission to the West Tennessee Healthcare Board of Trustees. A presentation was made to the Board of Trustees on September 25, 2012, and the Benton County Community Health Needs Assessment was approved on this date. The Plan will be updated every three years.

MEMORANDUM

DATE:

March 15, 2011

TO:

Heather Deckard

FROM:

Denny Smith, Camden General Hospital

RE:

Benton County Community Health Assessment Community Committee

For many years, Camden General Hospital has served the residents of Benton County. Over this period of time and especially in recent years, our hospital has provided a wide range of community health activities that include medical screenings, health fairs, health education classes, sponsorships, and other activities.

In past years Camden General has conducted needs assessment to ensure that the health activities conducted meet identified community needs. In addition, the recent Federal Patient Protection and Affordable Care Act (Health Care Reform) requires non-profit hospitals to conduct community needs assessment every three years.

We are beginning the process of assessing the community health needs in Benton County that will be a blending of residents' perception of the health issues facing us with health status and vital statistics on our community. We will distribute a survey throughout the community and the collect data on issues identified from the survey.

We invite you to be a member of the Benton County Community Committee that will help us review the survey data, and narrow that list of health issues to a manageable number by focusing on the size, seriousness, and the effectiveness of interventions. We anticipate this process will take three months and will in five (5) one hour meetings.

High Blood Pressure in Northwest TN

Have you ever been told by a doctor, nurse, or other health professional that you have high blood pressure?

	Northwest TN	TN
2009	39.3	32.6
2007	39.1	33.8

Are you currently taking medicine for your blood pressure?

	Northwest TN	<u>TN</u>
2009	85.7	81.8
2007	86.1	84.0

Uncontrolled high blood pressure increases risk of heart attack and stroke.

The average hospitalization cost for a stroke in persons 65 and older ranged between \$8,706-17,034 in 2000-2006.

High cholesterol, diabetes, obesity, tobacco and alcohol use, and age are risk factors.

Numbers reflect weighted risk within sample. Source: Tennessee Department of Health; Mayo Clinic; Center for Disease Control
